Historical evidences for the Christian Scriptures *by* Josh McDowell

Whitemaster

Josh McDowell does an excellent job leveraging the method to compose a college level research paper - systematically and in a logical flow - showing that there is a solid case for why the Christian Bible is reliable and the fantastic claims within it must be true. Beyond that, he leaves each factoid in bibliographical reference form so that you can more easily do your own research.

Can science build a case that counters McDowell? Of course...especially when they are interested in avoiding the idea of an invisible Creator. But science cannot refute these facts.

I would point out another good read on these lines: "God vs. Religion" written by Albert Einstein, who proved that other dimensions exist using scientific method...irrefutable by scientific standards. If other dimensions exist, which are invisible to us in the natural world, so also life can exist that is invisible to us in the natural. And it is in that realm that God exists, and from where He interacts with us, and in fact created the physical dimension with which we are all familiar.

If you rely on physical evidence to describe all that exists and you pursue truth over all, you'll want to read this because you're missing the part of the iceberg that resides under the water's surface.

This book "Evidence that demands a verdict" by Josh McDowell is a reference book as to the literal proof of the Bible and its contents. It is rather like reading an encyclopedia that contains so many physical and logical proofs of events in the Bible as to be astounding. In each chapter he gives further reading for more details concerning that chapter--another bonus. I got this book to study how we got the books of the Bible assembled and who or what committee, s authorized them--this book helped me understand this. He also goes into detail how the scribes hand wrote each Bible and the intricate rules surrounding them---an outstanding book---and for only 1 cent plus shipping--wow---if your faith is wavering because of lack of proof of spiritual stuff or if you simply want to grow more in your Christian life---this is the book for you---a must buy for every believer.

This book is good for the Christian laymen who want to go deeper in their understanding of the Scriptures, for high school students who may or may not have difficulty in trusting a 2,000 year old book to be true and accurate in what it says; also, for college students, pastors and seminary students who desire to seek the evidence for themselves. Josh McDowell has assembled and made clear the historical evidences for the Christian faith. So, if you're interested why Jesus Christ was and is profoundly different from any other man who ever lived, read this. You won't regret it!

This is a great book for someone that wants to learn about the Bible. This gives you the evidence how the Bible was put together and why we should read it. For me it answers the question, "why should I trust what is in the Bible, and why should I read it?"

A life changing expose' for belief in Christ. It put a solid foundation under my faith in the reality of Jesus. I bought it for my grandson graduating from high school and moving on to a state college. He will need fortification!

I can't brag enough about this book. Such valid points that made me stop and think. Faith can't be "taught" per se, but I understand the arguments and they each made a lot of sense. I let someone borrow my copy and I guess they liked it so much they forgot to return it.

LOVE THE BOOK and the author... Would never recommend this one on Kindle. You need to have the actual book !!!!

I was expecting it to discuss non-Biblical historical references to Jesus. It mostly didn't...it just discussed Bible passages.
