For entry-level courses in Beginning AutoCAD, Architectural AutoCAD, Interior Design AutoCAD, and Landscape Architecture AutoCAD. Class-tested on over 3,500 students, this text supplements the on-line course which offers a self-paced approach to learning AutoCAD, and assumes no prior technical knowledge. Ideal for students of architecture, drafting, interior design, landscape architecture, and engineering. It meets the needs of a variety of learners--from fast-paced to visual--and continually reinforces important concepts and commands in a highly repetitive manner that drives the point home.
